Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisdictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Henrietta Duvall and Annie J. Mayfield, National Center for Social Statistics.

Introduction

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

Medical Assistance (Medicaid) Financed Under Title XIX of the Social Security Act - March 1975

A record high of \$1.141 billion in total payments were made out of Title XIX funds in March 1975. Average monthly payments for the year ending March 1975 equalled \$1 billion, an increase of 2.0 percent over average monthly payments for the year ending in February.

A record number of 9.2 million ¹/₁ recipients had medical vendor payments totalling \$1.112 billion made in their behalf, during the month. The largest proportion of the 7.5 percent caseload increase of 655 thousand over February were members of families with dependent children whose numbers swelled by 462 thousand, an increase of nearly ten percent. Other Title XIX recipients showed a relatively higher increase of nearly twelve percent, however almost all of the increase was in Puerto Rico. The increase in family members with dependent children was relatively higher for children and nonmoney payment recipients. There were concurrently 293,089 persons enrolled in Health Maintenance Organizations whose premiums were paid out of Title XIX funds.

Persons Served

The percentage distribution of persons for whom medical payments were made by basis of eligibility and money payment status for March is as follows:

Basis of eligibility		Money Payment Status	
		Money payment authorized	Money payment not authorized
Total	100.0	76.6	23.4
Age 65 and over	22.4	14.3	8.2
Blindness	0.5	.5	.1
Permanently and totally disabled	13.1	10.3	2.8
Children under 21 in families	35.6	32.1	3.5
Adults in families with dependent children	21.4	19.5	1.9
Other title XIX under 21	3.4	xxx	3.4
Other title XIX age 21-64	3.6	xxx	3.6

More than half (57 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 in families and other title XIX recipients under 21 accounted

for 39.2 percent of recipients. Recipients eligible on the basis of age 65 and over accounted for 22.4 percent of the caseload. Recipients who also received money payments outnumbered nonmoney payment recipients by more than 3 to 1. Among members of families with dependent children under 21, nine out of ten medicaid recipients also received AFDC money payments.

Medical Payments by Groups of Persons Served

As shown below, the distribution of payments differs significantly from the caseload distribution. Payments for persons not receiving maintenance assistance are nearly equal to those for money payment recipients. The single largest proportion of payments (27.5 percent) are made on behalf of recipients aged 65 and older who are not also recipients of maintenance assistance. Such recipients represent only 8.1 percent of the caseload. Payments for these recipients, to a large extent, are made to medical inpatient facilities, which represent the more expensive types of medical services. Only 18.9 percent (less than half of the corresponding recipient proportion) of payments are made on behalf of children under 21 years of age. Among the eligibility groups under age 65, the largest proportion of payments (23.2 percent) are made on behalf of the permanently and totally disabled.

Basis of eligibility		<u>Money Payment Status</u>	
		Money payment authorized	Money payment not authorized
Total	100.0	53.1	46.9
Age 65 and over	38.5	11.0	27.5
Blindness	0.6	0.4	0.2
Permanently and totally disabled	23.2	14.5	8.7
Children under 21 in families	16.1	13.6	2.5
Adults in families with dependent children	15.8	13.6	2.3
Other title XIX under 21	2.8	xxx	2.8
Other title XIX age 21-64	3.0	xxx	3.0

Payments by Type of Service

About sixty-eight percent of medical vendor payments were made for inpatient services hospitals (31.4 percent), skilled nursing facilities (19.7 percent), and intermediate care facilities (17 percent). The proportion of payments for inpatient services was substantially lower than the previous two months during which time a substantial increase in skilled nursing facility payments occurred. For the month of March,

skilled nursing facility payments decreased by 28 million dollars from February. For the twelve month period ending in March 1975, the average monthly rate of increase (2.3 percent) for outpatient and practitioners' services was higher than the rate for inpatient services (1.9 percent). Among services other than inpatient, physicians' services and **prescribed** drugs account for the largest proportions of payments, representing 10.6 and 7 percent of the total, respectively.

Screening Services

Forty-eight States reported 142,392 children screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-three percent of the children screened were six years of age and older. Fifty percent of children screened had referable conditions uncovered and ninety-two percent of those with conditions uncovered were referred for diagnosis and/or treatment.

1/ Includes estimates for Colorado, Maryland, and Wyoming which were extrapolated from previous reports.

NOTE: Estimates are based on the average monthly amounts paid per recipient by State.

Annotations

1. The following definitions apply to symbols appearing in the detailed tables:
 - indicates no data reported.
 - *** indicates that the percent was not computed because the base was too small.
 - Z indicates that the percent was less than 0.05.
2. Arizona has no title XIX program and is excluded from the tabulations.
3. Colorado, Maryland and Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and are excluded from all applicable tables. Montana reported recipients and payments by basis of eligibility only.
4. States do not always report premium or per capita payments into the SSA system for aged and disabled recipients separately, as in Georgia, Maine, Vermont, and West Virginia where the payments reported under the aged category include payments for the disabled. For New Mexico, New York, and Utah, data related to payments into SSA system were not reported. There is variance from month to month in States reporting HMO premium payments because in some cases, such payments may be made less frequently than monthly.
5. Minnesota and Washington included HMO recipients and premium amounts in the data in Tables 2-14.
6. Data were estimated for New York and North Carolina and partially estimated for California and Michigan.
7. In addition to Colorado, Maryland and Wyoming; Massachusetts, Nevada, Pennsylvania, and Utah are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table 11. Pennsylvania did not differentiate other title XIX recipients by age and is excluded from Table 14.
8. For Utah, all adult recipients i.e., aged 65 and over, blind and disabled are reported under money payment not authorized even though some may be SSI recipients. North Carolina reported other title XIX recipients under 21 as children who are members of families.
9. Vermont excluded recipients of and payments for family planning services from the data reported in Tables 2-4 and 6-14.

10. In some States, two or more types of medical services may be grouped together under one class, as in Connecticut where other practitioners', clinic, laboratory and radiological, home health, and family planning services are included in other care, and as in South Carolina, where skilled nursing facility services include payments to State mental institutions.
11. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive adjustments which can be reported by type of service (Table 5) but which are not applicable to the recipients reported in Tables 2, 4, and 6-9.

Annotations specific for Screening Tables 15-20

12. States omitted from tables either did not report on screening services for March 1975 or there were no individuals screened during the month.
13. California reported 106,485 individuals receiving comprehensive physical examinations in addition to the screening data.
14. For Georgia, EPSDT screening data related to specified conditions are excluded from the tabulations.
15. Screening payments for Idaho, Illinois, Georgia, Michigan, New York, Pennsylvania, and Texas are not reported separately by age.
16. Data for the District of Columbia, Massachusetts, Ohio, Rhode Island, and Vermont are largely estimated and incomplete.
17. For Rhode Island, data include 83 newborns, for whom payments are reflected in physicians' or hospital services. There were an additional 25 persons screened for whom detail information was not available.
18. Payment for screening services were not reported by the District of Columbia, Maryland, Massachusetts, Puerto Rico and the Virgin Islands.

QUARTERLY HIGHLIGHTS
JANUARY-MARCH 1975

A total of \$3,338,687,000 was paid out of Title XIX funds during the quarter ended March 31, 1975, an increase of 11.9 percent over the previous quarter. Vendor payments totalled \$2,238,451,000; and an additional \$26,348,315 represented premium payments to health maintenance organizations for an average monthly number of 310,944 enrollees.

More than two billion dollars or 70 percent of the total vendor payments were made to inpatient facilities: general hospital (\$893,817,000); skilled nursing facilities (\$713,784,000); intermediate care facility (\$554,509,000); mental hospitals (\$117,532,000). In addition \$314 million and 218 million were expended for physicians' services and prescribed drugs, respectively.

The average monthly number of recipients for whom vendor payments were made during the quarter was 8,774,000; a national increase of 549,000 (6.7 percent) over the previous quarter. Of the total number of recipients receiving medical services, the largest increase was reflected for members of families with dependent children under age 21 and the age 65 and over category. These recipients increased from 4,497,000 to 4,925,000 (9.5 percent); and from 1,974,000 to 2,024,000 (2.5 percent), respectively. The number of other Title XIX recipients increased from 580,000 to 611,000 (5.3 percent); and the number of permanently and totally disabled recipients increased from 1,123,000 to 1,165,000 (3.7 percent). There was a slight decrease in the number of blind recipients from the previous quarter.

The national average monthly medical vendor payments increased from \$966.7 million to \$1,076.1 billion, a monthly increase of 109.4 million (11.3 percent) over the previous quarter. Although there was a slight decrease in the average monthly number of blind recipients from the previous quarter, the average monthly vendor payments for these recipients rose significantly, from \$6.5 million to \$7.8 million (19.9 percent). The average monthly medical vendor payments made on behalf of the aged recipients increased sharply from \$356.4 million to \$414.3 million (16.2 percent); payments for the permanently and totally disabled increased from \$225.2 million to \$247.8 million (10.1 percent); payments for members of families with dependent children increased from \$317.8 million to \$340.6 million (7.2 percent); and payments for other Title XIX recipients increased from \$60.8 million to 65.7 million (8.1 percent).

Seventy-six percent of the average monthly number of recipients were authorized to receive maintenance assistance in the form of money payments, however only 52 percent of medical payments were on behalf of money payment recipients.

A total of 440,660 children was reported as receiving screening services under the Early and Periodic Screening Diagnosis and Treatment Program (EPSDT) during the quarter. Payments for screening services totalled \$9,657,332.
